End User Profile

PT Veris is a company established in Jakarta on August 27, 2010, by Mr. Anil Kumar Khrisna and Mr. Krzystof Adam Berkiet, with Business Identification Number 9120601713402. Based on its business license, PT Veris operates in the field of Management Consulting Services, offering background check or background screening services for client candidates. PT Veris has earned the trust of dozens of companies both domestically and internationally over its more than ten years of operation.

Application Scenarios

Office Building

Project Requirements

PT Veris expects a reliable and efficient access control solution to ensure the security of all entry points within its workplace environment. In addition, an integrated access control system is required to support comprehensive management of attendance data and activity monitoring.

Project Solution

With the support of the SenseFace 4A device, this system helps enhance security and streamline the entry and exit process. This solution contributes to creating a safer and more efficient work environment.

Configuration

System	Type	Model
Access Control	Facial Recognition	SenseFace 4A
Access Control	ZKBioTime	ZKBT-Dev-P5
