Applications

Factory

In the factory, employees can store personal belongings and replace their clothing before entering the production line.

- Models: Online
- Mode: Card/ Facial/ QR code Authentication
- Way: One User One Cabinet

Supermarket

With large flow of people and high foot traffic and large demand for storage. Customers often choose to store personal items or hand-carry items temporarily.

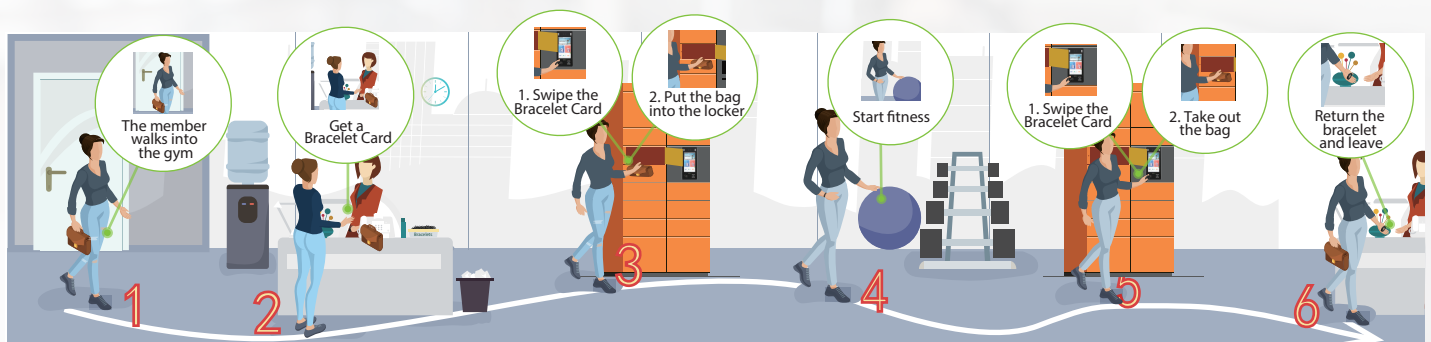

- Models: Offline
- Mode: Facial Authentication
- Way: One User One Cabinet
- Limitation: The storage time cannot exceed the current day

Gym

Members often get the bracelet at the front desk for personal belongings storage, and then take out the items their personal belongings and return the bracelet after workout.

- Models: Online
- Mode: Card Authentication
- Way: One User One Cabinet
- Limitation: The storage time cannot exceed the current day

Office

Employees tend to share files and equipment. Therefore, the administrator stores the shared items in the lockers, and if the employee needs a device or file, he can take it out after verification in the lockers.

- Models: Online
- Mode: Card/ Face/ Fingerprint Authentication
- Way: Multiple Person and One Cabinet
